

THE DoD ISSUANCE NUMBERING SYSTEM

1. BASIC NUMBERING SYSTEM. The Chief, Directives Division (DD), under the Director, Washington Headquarters Services, assigns numbers to DoD issuances based on the established subject groups and sub groups provided in the enclosure, and the recommendations of DoD Component heads with equity in a particular issuance.

a. DoD Directives (DoDDs) and DoD Instructions (DoDIs). The basic number is in Arabic numerals and consists of a 4-digit number representing a major subject group and its subgroup, followed by a decimal point and a 2-digit sequential number of the subgroup. For example:

(1) DoDI 5025.01 is in the major subject group “5000 – Acquisition, Administrative Management, Organizational Charters, Security, Public Affairs, and Legislative Affairs.”

(2) The number “25” represents the subgroup “5000-5099 – Acquisition and Administrative Management.”

(3) The number “.01” indicates that this is the first issuance assigned to that subgroup.

b. DoD Manuals (DoDMs). DoDMs are assigned the same number series as the DoDD or DoDI they implement when practicable. For DoDMs exceeding 100 pages in length, which are separated into volumes, each volume retains the same manual number, with the addition of a dash and volume number in Arabic numerals at the end, e.g.:

(1) DoD Manual 1400.25, Volume 1. Abbreviated as “DoDM 1400.25-V1.”

(2) DoD Manual 1400.25, Volume 2. Abbreviated as “DoDM 1400.25-V2.”

c. Administrative Instructions (AIs). AIs are not identified by subject. They are numbered sequentially beginning with the three digits Arabic numeral 001.

d. Directive-type Memorandums (DTMs). DTMs are numbered sequentially beginning with the year in which issued, followed by the Arabic numeral for that DTM; e.g., for the first DTM issued in calendar year 2008, “DTM-08-001.”

2. NUMBERING NEW ISSUANCES

a. DoDDs and DoDIs. The OSD Components initiating new directives and instructions propose a 4-digit major group and subgroup number from the list in the enclosure. Initiating Components should coordinate the proposed group and subgroup number with other components with equity in the issuance. When submitting the issuance to DD for precoordination edit, the e-mail requesting review should justify the final group/subgroup recommendation and include any comments made by other components. DD assigns a 2-digit alphabetic descriptor for the subgroup, rather than a sequential number, for use throughout the coordination and approval process. The 2-digit sequential number of the subgroup is added by DD when the issuance is approved and signed.

b. AIs and DTMs. DD assigns a temporary number to the DTM during precoordination review and a final number when the AI or DTM is signed.

3. NUMBERING REISSUANCES. Reissuances retain the same number as the original issuance. Numbers will not be reused for any other purpose.

4. DoDDs THAT ASSIGN EXECUTIVE AGENTS (EAs). The suffix “E” is added at the end of the number for all DoDDs that assign EAs.

5. CLASSIFIED AND FOR OFFICIAL USE ONLY (FOUO) ISSUANCES. The abbreviation of the highest overall security classification within the issuance precedes the issuance number: “C-” for Confidential, “S-” for Secret, and “TS-” for Top Secret. “O-” precedes the number of FOUO issuances.
