

**CERTIFICATION STANDARDS & CORE PLUS DEVELOPMENT GUIDE
ENGINEERING LEVEL III**

Type of Assignment	Representative Activities
Functional Engineer	<ul style="list-style-type: none"> ● Leads and/or manages, or provides technical oversight of engineering activities in a functional specialty relating to the design, development, fabrication, installation, modification, sustainment, and/or analysis of systems or systems components. ● Ensures appropriate systems engineering technical and technical management processes are properly applied to functional specialty activities that support IPT environments.
General Engineer	<ul style="list-style-type: none"> ● Leads and/or manages, or provides technical oversight of design and development activities for systems or systems components. ● Ensures appropriate systems engineering processes are properly applied during systems development.
Research Engineer or Scientist	<ul style="list-style-type: none"> ● Leads and/or manages science and technology research and engineering activities supporting acquisition programs, projects, or activities. ● Ensures appropriate systems engineering processes are properly applied during science and technology activities.

Core Certification Standards (required for DAWIA certification)

Acquisition Training	None
Functional Training	<ul style="list-style-type: none"> ● ENG 301 Leadership in Engineering Defense Systems (R) ● CLE 012 DoD Open Systems Architecture (OSA) ● CLE 068 Intellectual Property and Data Rights ● CLL 008 Designing for Supportability in DoD Systems
Education	Baccalaureate or graduate degree in a technical or scientific field such as engineering, physics, chemistry, biology, mathematics, operations research, engineering management, or computer science
Experience	<ul style="list-style-type: none"> ● Four years of technical experience in an acquisition position with: <ul style="list-style-type: none"> ● - At least 3 years in a ENG or S&TM position ● - Remainder may come from IT, T&E, PQM, PM, or LCL ● Similar experience gained from other government positions or industry is acceptable as long as it meets the above standard. ● ● EFFECTIVE 1 OCTOBER 2016, THIS STANDARD CHANGES TO: <ul style="list-style-type: none"> ● Four years of technical experience in ENG or S&TM position. ● Similar experience gained from other government positions or industry is acceptable as long as it meets the above standard.

Education			
Graduate degree in a discipline such as engineering, physics, chemistry, biology, mathematics, operations research, engineering management, or computer science			
Experience			
Four (4) years of technical experience (in addition to core certification experience)			

Notes:

1 The Core Certification Standards section lists the training and/or education and experience REQUIRED for certification at this level for this career field within 24 months of assignment.

2 "(R)" following a course title indicates the course is delivered as resident-based instruction.

5 When preparing your IDP, you and your supervisor should consider the training, education, and experience listed in the Core Plus Development Guide at this and the lower level(s) if not already completed.

13 Some continuous learning (CL) modules have been created by extracting lessons in their entirety from a training course. If this is the case for the CL module(s) identified in the above Core Certification Standards, the course from which the CL module was extracted is identified in the "Notes" section of the CL course description and the course can be substituted to meet the certification standard.
