

CERTIFICATION STANDARDS & CORE PLUS DEVELOPMENT GUIDE
LIFE CYCLE LOGISTICS LEVEL III

Type of Assignment	Representative Activities
L1 Product Support Management	Lead and oversee cost and performance across the product support value chain, from design through disposal.
L2 Supply Support	Oversee the identification of, planning for, resourcing, and implementation of management actions to acquire repair parts, spares, and all classes of supply to ensure the best equipment/capability is available to support the Warfighter or maintainer when it is needed at the lowest possible.
L3 Packaging, Handling, Storage & Transportation (PHS&T)	Oversee the identification of, planning for, resourcing and acquisition of packaging/preservation, handling, storage and transportation (PHS&T) requirements to maximize availability and usability of the materiel to include support items whenever they are needed for training or mission.
L4 Maintenance Planning & Management	Oversee the identification of, planning for, resourcing of and implementation of maintenance concepts and requirements to ensure the best possible equipment/capability is available when the Warfighter needs it at the lowest possible Total Ownership Cost (TOC).
L5 Design Interface	Collaboratively engage in and leverage the systems engineering process to impact the design from its inception throughout the life cycle, facilitating supportability to maximize the availability, effectiveness and capability of the system at the lowest Total Ownership Cost (TOC).
L6 Sustaining Engineering	Oversee, lead, or influence the design, implementation and execution of support for in-service systems in their operational environments.
L7 Technical Data	Oversee the identification of, planning for, resourcing, and implementation of management actions to develop and acquire information to operate, install, maintain, and train on the equipment to maximize its effectiveness and availability; effectively catalog and acquire spare/repair parts, support equipment, and all classes of supply; define the configuration baseline of the system (hardware and software) to effectively support the Warfighter with the best capability at the time it is needed.
L8 Computer Resources	Oversee the identification of, planning for, resourcing, and implementation of management actions to acquire and maintain facilities, hardware, software, documentation, manpower and personnel necessary for planning and management of mission critical computer hardware and software systems. Coordinate and implement agreements necessary to manage technical interfaces, and to manage work performed by maintenance activities. Establish and update plans for periodic test and certification activities required throughout the life cycle.
L9 Facilities & Infrastructure	Oversee the identification of, planning for, resourcing, and implementation of management of facilities to enable training, maintenance and storage to maximize effectiveness of system operation and the logistics support system at the lowest TOC. Identify and prepare plans for the acquisition of facilities to enable responsive support for the Warfighter.
L10 Manpower & Personnel	Oversee the identification of requirements for, planning for, resourcing, and implementation of management of personnel, civilian and military, with the grades and skills required to operate equipment, to complete the missions, to effectively fight or support the fight, to win

Education

- Master's degree in a logistics, business, management, or technical field, such as systems design and operational effectiveness, or similar systems engineering/ technical education, business administration, and/or supply chain management
- Joint Professional Military Education (JPME) such as the Dwight D. Eisenhower School for National Security and Resource Strategy
- Leadership and management courses such as Harvard Business School (HBS) training modules on the Continuous Learning page of the iCatalog.

Experience

8 years of life cycle logistics experience in support of acquisition or sustainment of DoD weapons/ materiel systems

Notes:

- 1** The Core Certification/Training Standards section lists the training and/or education and experience REQUIRED for certification at this level or training for this career path within 24 months of assignment.
- 2** "(R)" following a course title indicates the course is delivered as resident-based instruction.
- 5** When preparing your IDP, you and your supervisor should consider the training, education, and experience listed in the Core Plus Development Guide at this and the lower level(s) if not already completed.
- 11** Workforce members assigned to the position(s) listed in the Unique Position Training Standards section MUST meet these training standard(s) within 24 months of assignment.
